MOHIT SISODIYA

Senior Software Engineer · Backend Tech Lead

mohitsisodiya76@gmail.com | +91 94794 44215 | linkedin.com/in/mohitsisodiya09 | mohitsisodiya.vercel.app | Indore, MP

PROFESSIONAL SUMMARY

Senior Software Engineer / Backend Tech Lead with 6+ years of experience building and scaling production systems across fintech, logistics, SaaS, and marketplace domains. Specialised in Node.js, Express.js, and NestJS, with expertise in backend architecture, microservices, API design, authentication and RBAC, payment integrations, and real-time systems. Delivered 13 projects, including solutions for Shell and DP World, and led cross-functional teams of up to 8. Improved API latency by up to 60% and reduced CI/CD times by approximately 60–70%; experienced in LLM-powered document processing (OpenAI, xAI Grok), technical mentoring, and engineering standardisation.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript, TypeScript, Node.js, NestJS, Express.js
- **Databases:** MongoDB, PostgreSQL, MySQL, Redis
- **API, Architecture & Messaging:** REST APIs, GraphQL, Webhooks, Microservices, MQTT, BullMQ, Socket.io
- **Auth & Security:** Authentication (JWT, OAuth2, SSO), Authorisation (RBAC), API Security, Audit Logging
- **Cloud, DevOps & Testing:** AWS, Azure DevOps, GitHub Actions, Jest, Mocha
- **Integrations:** Stripe, Twilio, SendGrid, Veriff, ImageKit, Google APIs, Microsoft Dynamics CRM
- **GenAI & OCR:** LLMs (OpenAI, xAI Grok), OCR (Azure AI Document Intelligence), Prompt Engineering
- **Project Management:** Jira, Azure Boards, Trello, Monday.com, Plane, Microsoft Planner

PROFESSIONAL EXPERIENCE

Senior Software Engineer & Technical Lead · **Thinkwik Technology Pvt Ltd, Ahmedabad** *Jan 2025 – Sep 2026*

- Progressed from an individual contributor on Loot to leading cross-functional teams of up to 8, owning system architecture, technology selection, sprint planning, technical roadmaps, and client communication.
- Architected and developed backend systems for four products using Node.js, NestJS, MongoDB, PostgreSQL, MySQL, and AWS, choosing monolithic or microservices architecture per product and implementing RBAC, audit logging, and idempotent payment workflows.
- Refactored and optimised backend services across multiple products, reducing API latency by up to 60%.
- Optimised GitHub Actions CI/CD pipelines across React.js, Next.js, and Express.js projects, reducing build and deployment times by approximately 60–70%.
- Mentored juniors and interns through code reviews, onboarding, technical guidance, and knowledge sharing.

Senior Software Engineer · **ViitorCloud Technologies Pvt Ltd, Ahmedabad** *Jan 2022 – Oct 2024*

Joined as Software Engineer (Jan 2022 – Feb 2023)

- Promoted to Senior Software Engineer within 14 months, progressing from backend development in a 20-member enterprise team on Cargoes Flow (DP World) to leading backend teams of 3–6 engineers.
- Led backend API design, workflow architecture, implementation, and code reviews for several projects, collaborating with frontend, mobile, and client teams.
- Built monolithic and microservices backends with enterprise integrations, including Azure AD and LDAP SSO, JWT/OAuth2, RBAC, Stripe, Twilio, MQTT telemetry, and Microsoft Dynamics CRM.
- Developed reusable Express.js and NestJS boilerplates to standardise project setup and speed up backend development across the team.
- Mentored juniors and interns through onboarding, code reviews, and day-to-day technical guidance.
- *Also delivered:* **FixiGo** (Jun – Oct 2024), car-service platform, Backend Team Lead of 3; **Digital Sikh History Museum** (Nov 2023 – May 2024), Technical Lead of 6 backend developers on a digital museum and CMS; **JNPT** (Aug – Oct 2023), sole backend lead for real-time MQTT vehicle tracking with geo-fencing in a 3D digital twin; **Cargoes Flow, DP World** (Apr – Oct 2022), shipment-tracking APIs in a 20-member team; **DP World Connect** (Feb – Mar 2022), digital business card platform with Dynamics CRM integration.

Innovation Engineer · **SimplyFI Softech India Pvt Ltd, Bangalore** *Jun 2020 – Jan 2022*

Joined as Software Developer Intern (Jan 2020 – May 2020)

- Built backends for three products: two fintech platforms (loan management, EMI repayments, supply-chain financing) and a consulting marketplace, using Node.js/Express with MongoDB and PostgreSQL on AWS.
- *Delivered:* **Tulipfee** (Jun – Dec 2020), **Tulipfin** (Jan – May 2021), **Gurubantu** (Jun 2021 – Jan 2022).

Freelance Backend Developer *Aug 2018 – Jan 2020*

- Built backend APIs and database models for client projects using Node.js, Express.js, MongoDB, and PostgreSQL.

KEY PROJECTS

Thinkwik Technology Pvt Ltd

FranchiseListings.com — Franchise Marketplace (Enterprise SaaS) *Apr 2026 – Sep 2026*

Technical Lead & Project Manager · 8-member team (3 FE, 2 BE, 1 DevOps, 1 QA, 1 BA)

Node.js, TypeScript, Express.js, MongoDB, AWS, Socket.io, Stripe, Twilio, Veriff, OpenAI API (GPT-4.1)

- Led end-to-end delivery (solution architecture, sprint planning, roadmap, client communication) of a platform connecting franchisors, franchise buyers, and franchise professionals.
- Hands-on in backend and API design for search, lead management, Stripe payments, Twilio, Veriff identity verification, and RBAC; built WhatsApp-style real-time chat with push notifications (Socket.io); integrated Google Maps, Places API, and reCAPTCHA v3.
- Implemented a GPT-4.1 pipeline that extracts, parses, and validates FDD data into structured JSON, auto-populates multi-step listing forms for user review and editing, and saves to the database.

Elixia (Shell), Petroleum Logistics Platform *Dec 2025 – Mar 2026*

Senior Software Engineer, Backend Lead · 3-member team

Node.js, TypeScript, NestJS, MySQL, MongoDB, Microservices

- Designed the microservice backend that automates order generation, shipment scheduling, inventory validation, and sales analytics for admins, transporters, consignors, and consignees.
- Led backend development and system design, planned sprints, and presented product demos to Shell's international teams.

ITADly, IT Asset Disposition SaaS *Jun 2025 – Nov 2025*

Technical Lead & Project Manager · 8-member team

Python, FastAPI, React.js, TypeScript, PostgreSQL, SQLAlchemy, AWS, Pandas

- Led architecture, technology selection, and delivery of a platform managing the lifecycle of retired IT assets: inventory, secure data sanitisation, hardware disposition, compliance reporting, and document management.
- Hands-on in backend architecture, AWS cloud infrastructure, and PostgreSQL database design.

Loot, Digital Lending Platform *Feb 2025 – May 2025*

Senior Backend Developer

Node.js, Express.js, MongoDB, PostgreSQL, AWS, SendGrid, Azure AI Document Intelligence, xAI Grok API

- Built lending, repayment, and financial transaction services with secure APIs, payment workflows, and audit logging, serving up to 5M monthly API requests.
- Led the Early Payoff feature (repayment calculation engine, idempotency keys) with underwriting and ops teams.
- Implemented a bank-statement analysis pipeline using Azure AI Document Intelligence for OCR and xAI Grok for parsing and structured JSON; analysed up to 12 months of transactions to calculate financial indicators and assess loan eligibility against predefined business rules.

ViitorCloud Technologies Pvt Ltd

Calenso, Enterprise Scheduling SaaS (GDPR-compliant) *Nov 2022 – Jul 2023*

Backend Lead · 5-member team

Node.js, TypeScript, Express.js, PostgreSQL, BullMQ, Redis, Azure AD, LDAP, Microservices

- Built a custom authentication and role-based authorisation system, replacing Auth0.
- Migrated a PHP-based queue to BullMQ with Redis and integrated Azure AD and LDAP for enterprise SSO.

EDUCATION

Bachelor of Engineering — Information Technology *2014 – 2018*

Shri Vaishnav Institute of Technology & Science, Indore · RGPV University, Bhopal
