MOHIT SISODIYA

Senior Software Engineer · Backend & Node.js Specialist · Technical Lead
mohitsisodiya76@gmail.com | +91 94794 44215 | linkedin.com/in/mohitsisodiya09 | mohitsisodiya.vercel.app | Ahmedabad, GJ

PROFESSIONAL SUMMARY

Senior Software Engineer and Technical Lead with 5+ years of experience architecting scalable Node.js backends for fintech, petroleum logistics, franchise, and GenAI platforms. Led cross-functional teams of up to 10 engineers across AWS, GCP, and Azure — delivering 60%+ API performance improvements and 40-50% faster deployment cycles in production. Hands-on across the full backend spectrum: microservices, real-time systems (MQTT, WebSockets), payment integrations (Stripe, Razorpay, PayPal), compliance-grade fintech workflows, and AI/GenAI pipelines.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript
Runtime & Frameworks: Node.js, NestJS, Express.js
Databases: MongoDB, PostgreSQL, MySQL, Redis (caching & pub/sub)
Messaging & Streaming: MQTT, BullMQ, Socket.io
Cloud Platforms: AWS, GCP, Azure
API Design: REST, GraphQL, Webhooks
Auth & Security: JWT, OAuth2 / SSO, RBAC, API key management, Secure transaction handling
DevOps & CI/CD: Docker, GitHub Actions, GitLab CI
Testing: Jest, Mocha, Unit / Integration / E2E testing
Payments & Integrations: Stripe, Razorpay, PayPal, Twilio, Sendgrid, Veriff, Imagekit
AI / GenAI: Document intelligence, OCR pipelines, LLM integration
Project Management: Jira, Azure DevOps, Trello, Monday.com, Plane, Microsoft Planner

PROFESSIONAL EXPERIENCE

Senior Software Engineer · Technical Lead · Thinkwik Technology Pvt Ltd, Ahmedabad
Jan 2025 – Present

Fintech · Petroleum Logistics · Franchise Marketplace · GenAI — Client-facing architecture & full delivery ownership

- **Led cross-functional teams of up to 7** (Frontend, Backend, DevOps, QA) across concurrent product lines; owned sprint planning, monthly roadmap definition, client communication, and end-to-end delivery accountability.
- Architected microservice and monolithic backends for four production platforms (Loot, Elixia, FranchiseListings, GenAI tooling) deployed on AWS — maintaining 99%+ uptime across distributed infrastructure.
- **Drove a 60%+ reduction in API response latency** through Redis caching, PostgreSQL/MongoDB query optimization, and connection pooling across high-throughput production services.
- Built and owned CI/CD pipelines (GitHub Actions, GitLab CI), cutting deployment cycle time by 60–70% and enabling reliable multi-environment releases across all active products.
- Conducted GenAI R&D: built OCR-based document intelligence pipelines, custom extraction workflows, and LLM-powered AI chatbot interfaces for internal and client-facing products.
- Mentored 5+ engineers through code reviews and architectural walkthroughs; served as primary technical escalation contact for international client stakeholders.

Senior Software Engineer · ViitorCloud Technologies Pvt Ltd, Ahmedabad
Jan 2022 – Oct 2024

Promoted from Software Engineer · Led teams of up to 10 engineers · Enterprise projects across 4 verticals

- **Designed scalable NestJS/Node.js backends** for enterprise-grade platforms across automotive, port authority, and digital heritage verticals; built reusable boilerplate templates reducing project kickoff time by up to 30%.
- Implemented JWT, OAuth2/SSO, and RBAC auth systems; enforced rate limiting, audit logging, and secure webhook handling for compliance-sensitive production workloads.
- Integrated Stripe and Razorpay payment gateways; designed idempotent transaction handling and reconciliation logic for high-reliability financial operations.
- **Built a real-time IoT telemetry pipeline** using MQTT and PowerShell data ingestion for JNPT port authority — enabling live vehicle tracking within a 3D digital twin environment.

- Led cross-functional teams of 6–10 engineers; managed sprint ceremonies, conducted weekly code reviews, and owned client relationship management across all project phases.

Innovation Engineer (Software Engineer) · **SimplyFI Softech India Pvt Ltd, Bangalore** *Jun 2020 – Jan 2022*

Full-time · Fintech & EdTech platforms · Node.js backend development · Agile product teams

- Architected and delivered backend systems for two fintech platforms — **Tulipfin** (working capital & supply chain finance for anchors, counterparties, and financial institutions) and **Tulipfee** (school fee financing with EMI management) — using Node.js, Express.js, MongoDB, and PostgreSQL.
- Built **Gurubantu**, a consultant marketplace platform connecting clients to expert professionals for hourly and project-based engagements; designed API architecture, data models, and booking workflows end-to-end.
- Designed database schemas and application architectures across three live products; provided technical leadership to team members and contributed to design recommendations for new and existing codebases within an agile delivery framework.

Software Developer Intern · **SimplyFI Softech India Pvt Ltd, Bangalore** *Jan 2020 – May 2020*

Node.js · Express.js · MongoDB · PostgreSQL · MySQL

- Developed and tested application features using Node.js, Express.js, MongoDB, PostgreSQL, and MySQL; wrote technical documentation and contributed to debugging and deployment workflows.

Freelance Backend Developer · **Independent** *Aug 2018 – Jan 2020*

Node.js · Express.js · MongoDB · PostgreSQL · Client project delivery

- Delivered outsourced Node.js backend projects for clients while pursuing full-time opportunities; built production APIs and database models across multiple client engagements.

KEY PROJECTS

Thinkwik Technology Pvt Ltd

FranchiseListings.com — Franchise Marketplace Platform *Nov 2025 – Present*

Technical Lead & Project Manager · Express.js · Next.js · MongoDB · AWS · Stripe · Twilio · Veriff

- **Led 7-member cross-functional team** (3 FE, 2 BE, 1 DevOps, 1 QA): requirements, monthly roadmap, sprint management, and client delivery for a franchise marketplace connecting franchisors, buyers, and professionals.
- Architected backend services for advanced search, lead management, multi-role directory, Twilio-powered communication, and Veriff identity verification — deployed on AWS with MongoDB.
- Designed Stripe payment flows and RBAC data models supporting franchisor, buyer, and professional user roles with fine-grained access control.

Elixia — Shell Petroleum Logistics Platform *Jul 2025 – Nov 2025*

Senior Software Engineer · Backend Architecture · Node.js · NestJS · MySQL · MongoDB · Microservices

- **Designed microservice backend** for Shell's petroleum logistics platform, automating order generation and scheduling for consignors and consignees based on live sales and stock analytics.
- Built workflow services for retail outlet sales validation, inventory reconciliation, and consignment scheduling; presented product demos to Shell's international team and drove technical decisions in a lean 3-person squad.

Loot — Fintech Lending Platform *Jan 2025 – Jul 2025*

Senior Backend Developer · Node.js · Express.js · PostgreSQL · MongoDB · AWS · Payment Processing

- **Built core lending, repayment, and risk services** for a digital working capital platform serving small businesses — handling revolving credit lines, loan servicing, and regulatory compliance workflows at up to 5M monthly API requests.
- Engineered the 'Early Payoff' feature end-to-end: API contracts, repayment calculation engine, disbursement integrations, idempotency keys, and full audit logging for financial traceability.

ViitorCloud Technologies Pvt Ltd

FixiGo — On-Demand Car Care Platform *Jul 2024 – Oct 2024*

Technical Lead · Senior Software Engineer · Express.js · MongoDB · AWS · Microservices · Twilio

- Led backend architecture and API development for an on-demand automotive service platform enabling at-location car maintenance and cleaning; integrated Twilio for real-time SMS notifications and live job status tracking across customer and technician interfaces.
- **Coordinated a 3-member backend team**: conducted code reviews, designed application workflows, and served as primary technical contact during the client-facing launch phase — delivering the platform within a 4-month timeline.

JNPT — Port Authority 3D Digital Twin *May 2024 – Jul 2024*

Technical Lead · Senior Software Engineer · Express.js · Unity 3D · MQTT · MongoDB · PowerShell

- **Architected real-time ITV tracking backend** for Jawaharlal Nehru Port Authority using MQTT telemetry ingestion and Node.js stream processing, visualized within a Unity 3D interactive port model.
- Implemented geo-fencing logic for automated route-deviation alerts; delivered full backend in 6 weeks as sole backend lead.

Digital Sikh History Museum (DSHM) — Heritage Platform *Aug 2023 – Apr 2024*

Technical Lead · Backend · Node.js · NestJS · Angular · Ionic · AWS · Stripe · CMS

- **Led a 6-member backend team** delivering REST APIs for artifact management, exhibition publishing, and a multilingual CMS for a global digital heritage platform across web and mobile — with AWS infrastructure optimization and Stripe payment integration.

EDUCATION

Bachelor of Engineering — Information Technology *2014 – 2018*

Shri Vaishnav Institute of Technology & Science, Indore · RGPV University, Bhopal
